Vadodara, India

EDUCATION

- The Maharaja Sayajirao University of Baroda** Vadodara, India
Bachelor of Engineering — Computer Science & Engineering (CGPA: 8.2) *Expected May 2028*

SKILLS

- Languages:** Java, Python, C/C++, JavaScript, HTML5, CSS3
- Tools & Technologies:** Git, GitHub, Cloud AI Tools
- AI / ML:** Machine Learning, Generative AI, Data Analysis
- Soft Skills:** Leadership, Collaboration, Communication, Project Management

PROJECTS & EXPERIENCE

- AgriForge — KrishiMitra AI** Pilot Stage
AI-driven Agricultural Platform *2025 – Present*
 - Developed an AI-powered platform providing **24x7 support to farmers in 10+ Indian languages** through voice and text.
 - Integrated AI models including **EfficientNet for crop disease detection**.
 - Awarded **Rs. 2.43 Lakh SSIP (Student Startup and Innovation Policy – Govt. of Gujarat)** research funding.
- Urban Intel AI — Smart City Governance Platform** Ingenius Hackathon
AI + Local LLM Architecture *2026*
 - Built a **Hybrid AI system** using 6 Random Forest models to predict urban risks such as traffic congestion, water scarcity, and health hazards.
 - Integrated a **private TinyLlama LLM** to generate real-time policy recommendations while maintaining data sovereignty.
- Eunoia Homoeopathy Website** Client Project
Web Development & Deployment *2026*
 - Developed and deployed a **live client website** for a homoeopathy clinic.
 - Handled **UI/UX design, domain setup, hosting, and deployment** while working with real client requirements.

HACKATHONS & ACHIEVEMENTS

- Winner — NASA Space Apps Challenge 2025:** Built **CityFage “Mumbai Pulse”**, an AI-powered system analyzing NASA datasets to monitor air quality, heat, and environmental risks.
- 1st Runner Up — Ingenius Hackathon 7.0:** Ranked **2nd among 180+ teams** at Ahmedabad University for building Urban Intel AI smart city governance system.
- 2nd Rank — IBM AI Innovation Challenge 2026:** Secured **2nd position across Gujarat** among shortlisted teams; presented an AI solution focused on strengthening India’s agricultural ecosystem.
- Finalist — Hackovate LJ:** Built ML pipeline predicting **cow milk yield and health anomalies** using sensor and historical data.
- Participant — ISRO SpaceTech Innovation Hackathon:** Developed satellite-data based geospatial solutions under national-level ISRO initiative.

PROGRAMS & CERTIFICATIONS

- Google Cloud Career Launchpad — Generative AI Track:** Selected as a **Diamond League contestant** gaining hands-on experience with cloud-based AI tools.
- Google Prompt to Prototype Program (Scaler):** Training focused on rapid AI product prototyping using modern generative AI workflows.

LEADERSHIP & ACTIVITIES

- Core Team Member — Neuralize AI/ML Club:** Active member of MSU’s AI/ML club contributing to organizing workshops, hackathons, and AI learning initiatives.
- Web Team Member — Code Vimarsh:** Contributed to development and management of club web projects and technical initiatives.
- AI/ML Community Engagement:** Actively organizing AI/ML discussions, workshops, and hackathon collaborations within university communities.
